

RACHAEL HAYES

M . A . C C C - S L P

Hello.

I have been working as a Speech-Language Pathologist for 14 years. I have worked in early intervention with the birth to three year population as well as in rehab facilities with adults; however, the majority of my experience is with preschool through high school students.

I enjoy getting to know each student and in some cases their families and other supportive individuals in their lives.

A little more about me.

I live in Indiana with my husband and two dogs. My husband and I have been foster parents for the last 2 years and counting. When I'm not working, I enjoy running, being outdoors, trips to the lake with family and friends, gardening and cooking.

Fun fact.

I enjoy running half marathons but haven't quite found the time for full marathon training.
